RE: Hazardous Waste Generator Reporting Requirements

This is to notify you that all hazardous waste generators registered in Missouri must submit manifest summary reports. As of the date of this letter, the Hazardous Waste Program (HWP) has not received manifest summary reports on your hazardous waste activity for the period July 1, 2005 to June 30, 2006. This is a violation of 40 CFR Part 262, Subpart D, as incorporated and modified by 10 CSR 25-5.262.

Please complete these reports and file them with the department within 30 days of receipt of this letter. Also, double check these reports for accuracy. If we do not receive them within the 30 days, we may initiate the following actions:

- a) **All Missouri facilities that either treat, store, or dispose of hazardous waste from off-site, or conduct recycling of off-site waste under a Missouri Resource Recovery Certificate, shall be informed that if they accept any hazardous waste from you before you have updated your registration information, they are subject to prosecution for a knowing violation of the Missouri Hazardous Waste Management Law and Regulations and appropriate enforcement and penalties shall be sought by the state.**
- b) **Your company may be referred to the Attorney General's Office for a determination of whether pursuit of monetary or other penalties is appropriate.**

If you did not generate or ship hazardous waste during this period, please complete Part I of the "Generator's Hazardous Waste Summary Report" form and indicate "No waste" appropriately on the form. If your firm no longer generates waste, please send a written request on company letterhead to the department asking that your generator ID number be inactivated.

Notice of Violation

Page 2

Upon receiving your manifest summary reports, we will calculate any fees due and send you a bill with an explanation of the calculations. If your hazardous waste generation activity has resulted in liability for any fees under 260.380 or 260.475 RSMo, failure to pay those fees may also result in enforcement action. Recent legislation established a late fee of 15% on all waste fees not paid by the statutory deadline of January 1 of each year. In addition, for applicable Land Disposal Fees not paid by January 1, interest of ten percent annually will also be charged from that due date until the fees are paid. Since your summary report, and therefore any fees associated with waste generation is past due, your company will be assessed the late fee and/or interest.

If you have questions or need to obtain a copy of the "*Generator's Hazardous Waste Summary Report*", please contact Mr. David Green of the Hazardous Waste Program at (573) 751-3204. If you have internet access, you may download the form from the following address:

www.dnr.mo.gov/env/hwp/download.htm#summaryreports

This form can be completed using Microsoft Excel. However, if you do not have Excel, there is a free download software at this same web address that will allow you to complete the form.

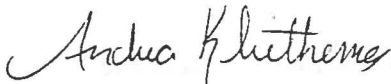

In order to submit your report electronically, you must have activated your Personal Identification Number (PIN). If you have not done so, and do not have the PIN response form, please contact David Green to obtain one. Electronic reports can be submitted via email to hazwastereport@dnr.mo.gov. Manifests must still be submitted by mail.

Please send all correspondence concerning this matter to the Hazardous Waste Program, P.O. Box 176, Jefferson City, MO 65102-0176.

I appreciate your prompt attention to this matter. Thank you.

Sincerely,

HAZARDOUS WASTE PROGRAM

Andrea Kliethermes
Budget and Planning Section Chief
